EDUCATION

Saigon University
B.S. Information Technology

Expected Graduation: September 2026
Current GPA: 3.39/4.0

COURSEWORK

- Object-Oriented Programming (Java)
- Data Structures & Algorithms
- Database Systems (SQL, MySQL)
- Software Engineering
- Backend Development (RESTful API, Spring Boot)

SKILLS

Languages: Java, JavaScript
Backend: Spring Boot, RESTful API
Database: MySQL
Tools: Git, Postman

PROJECTS

- Healthcare Appointment Booking System (Team Project)** | *Java, Spring Boot (Microservices)* Nov. 2025
- Contributed to Appointment Service in a microservices-based system (user, doctor, appointment).
 - Implemented statistical APIs to calculate appointment metrics and revenue for admin and doctors.
 - Built reporting features using JasperReports to generate printable reports.
 - Designed and optimized database queries (JOIN, aggregation) for appointment data and revenue analysis.
 - GitHub: <https://github.com/doanh dai/clinic-booking-microservices>
- Quizcraft - Quiz Management System** | *Java, MySQL, Swing, Maven* Mar. 2025
- Developed a desktop-based quiz management system using a three-layer architecture (BLL, DAL, UI).
 - Implemented question and answer management with difficulty levels and topic-based organization.
 - Built Excel import functionality using Apache POI with input validation to ensure data integrity.
 - Developed statistical dashboards using JFreeChart to visualize exam results and performance metrics.
 - Designed and executed database operations (CRUD, JOIN) for managing questions, exams, and results.
 - GitHub: <https://github.com/NHTPhuong35/quizcraft.git>
- Bookstore Management System** | *Java, MySQL, NetBeans, Git* Sep. 2024
- Developed a desktop application for small-scale bookstore management using three-layer architecture (DAO, BUS, GUI).
 - Implemented features for inventory tracking, book searching, invoice management, and revenue calculation.
 - Designed a user-friendly interface for efficient sales and stock management.
 - Utilized MySQL for secure data storage and retrieval.
 - Handled business logic for order processing and revenue calculation in the BUS layer.
 - GitHub: https://github.com/NHTPhuong35/QL_BANSACH

SUMMARY

Final-year Information Technology student with a strong foundation in Java, Spring Boot, and backend development. Experienced in building RESTful APIs, working with MySQL, and developing real-world applications through academic projects.
